## A Bed for Every Head

### RENEWING PURPOSE AND HOPE

The Landing Zone Campus by Compassion Shelters is truly a turn key solution, from showers and bathrooms, to food courts and counseling. We are even able to incorporate on-site waste processing when necessary. Professional support teams such as Comprehensive Health Services will provide operations to The Landing Zone, including on-site medical services and security. But we don't stop there. We have incorporated Vo-Tech "Tasting" schools to allow residents the ability to experience hands-on training and exposure to a variety of blue collar skills so desperately lacking in the US today. We want to show people there is **hope** and they do have a **purpose**.

**A Bed for Every Head** Landing Zone will consist of an aesthetically pleasing environment for both residents and neighbors. The shelter designs are more of a barracks style housing and are split up to house men, women, couples, and families. The amenities of the facility, such as food service, counseling, and service booths, will be located in the HUB building in the center of the campus.

We are going to **restore purpose and hope** for tomorrow by providing work opportunities in an environment where Landing Zone residents can restart their lives.

Workforce Health Solutions Made Easy

## SPECIALIZING IN AND PROVIDING:

- Medical Professionals
- Counselors
- On-site clinics
- Food service
- Janitorial service
- Campus security
- Drug screening and treatment
- All wrap-around operational services needed in the Landing Zone

---

The Landing Zone campus is more than just transitional housing or a temporary shelter. **It is A PLACE TO START.** As each Landing Zone is opened, Vo-Tech “Tasting Schools” will be housed independently throughout the facility. These “Tech Appetizers” will provide the veteran residents the ability to experience hands-on training and exposure to a variety of blue-collar skills so desperately lacking in the US today.

### Some of the training will consist of:

- Manufacturing of products for the Landing Zone
- Woodworking
- Plumbing
- Electrical
- Computer Aided Design and Manufacturing
- Construction Skills
- Online Marketing and Sales
- Money Management

The “Tech Tasting” is not intended to compete with available education, but to expose residents to some of the amazing jobs available in this “Land of Opportunity.” Residents will be placed in the Landing Zone for a period of time necessary to adequately move them into their next step. Residents will be evaluated on a case-by-case situation to determine the next steps, which may include continued education, direct hire, or a number of employment possibilities.

## The Landing Zone Manufacturing Area

In-house manufacturing at Landing Zone locations will provide a sense of worth and accomplishment for those who are a part of The Landing Zone Community.

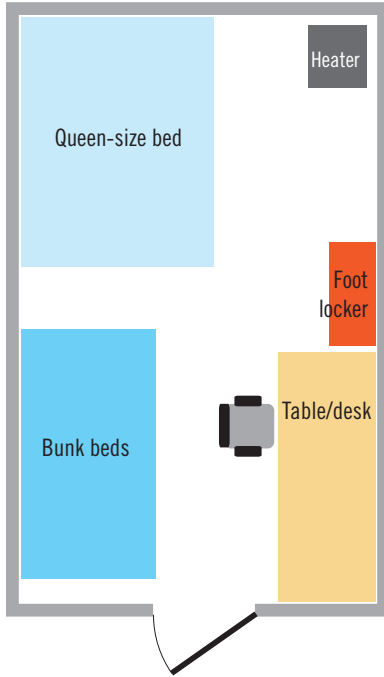

Each **Landing Zone Assembly Plant** (LZAP), will have the responsibility to process the building components from the Panel stage to a shippable product.

- Each LZAP only low voltage and hand tools. (110v)
- Workers will unload the trucks, edge the panels, clean, insert, collate.
- Completed panels will be loaded into 5 or 7 20' Sea Containers simultaneously as panels are produced by type, not by building.

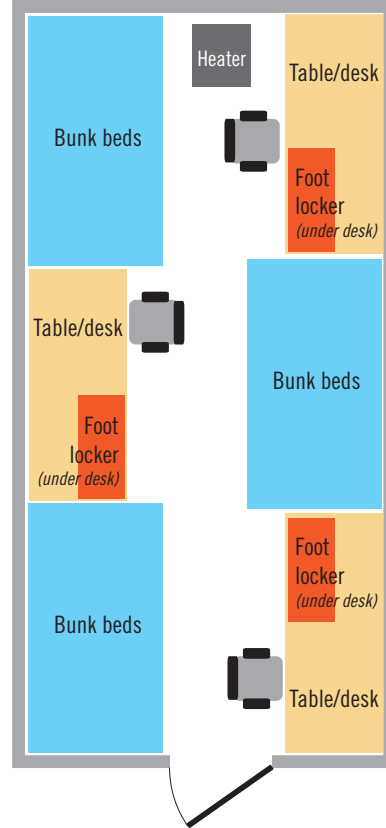

Each completed sea container will then be shipped, or stored and readied for next location.

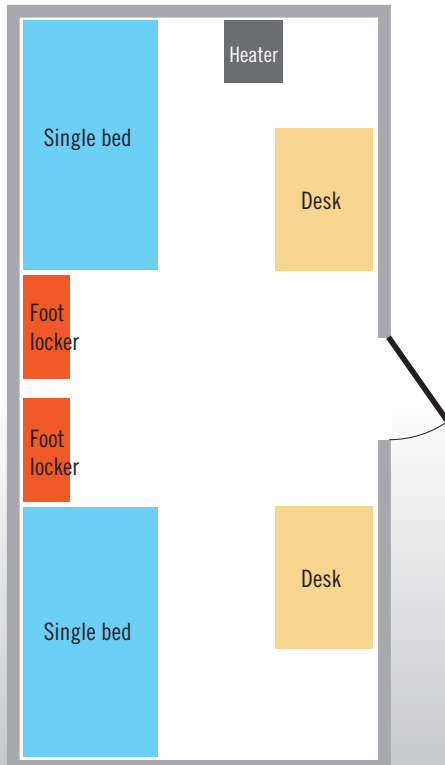

**Family shelter – 10' x 16'**

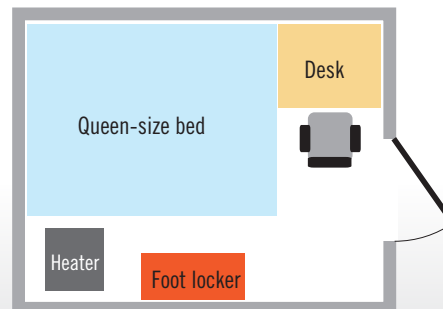

**Singles shelter – 10' x 20'**

**ADA shelter – 10' x 20'**

**Couples shelter – 10' x 8'**

## Get reliable, energy-efficient Wastewater Treatment ... **Anywhere!**

Photo courtesy of Erik Liles

Mining camps in Alberta and Texas. A pipeline response station in the Yukon. An oil drilling platform in Cook Inlet. A hurricane-devastated resort in St. Lucia.

For more than a decade, Orenco's AdvanTex® technology has provided reliable, energy-efficient wastewater treatment in some of the world's most remote places. Now, the AdvanTex AX-Mobile™ is Orenco's most portable treatment plant yet.

### Complete, Portable Solution for Wastewater Treatment

The AX-Mobile Treatment System is completely pre-packaged and built inside a durable, insulated fiberglass tank that is easy to ship and set. Ship by truck, rail, cargo container, or aircraft.

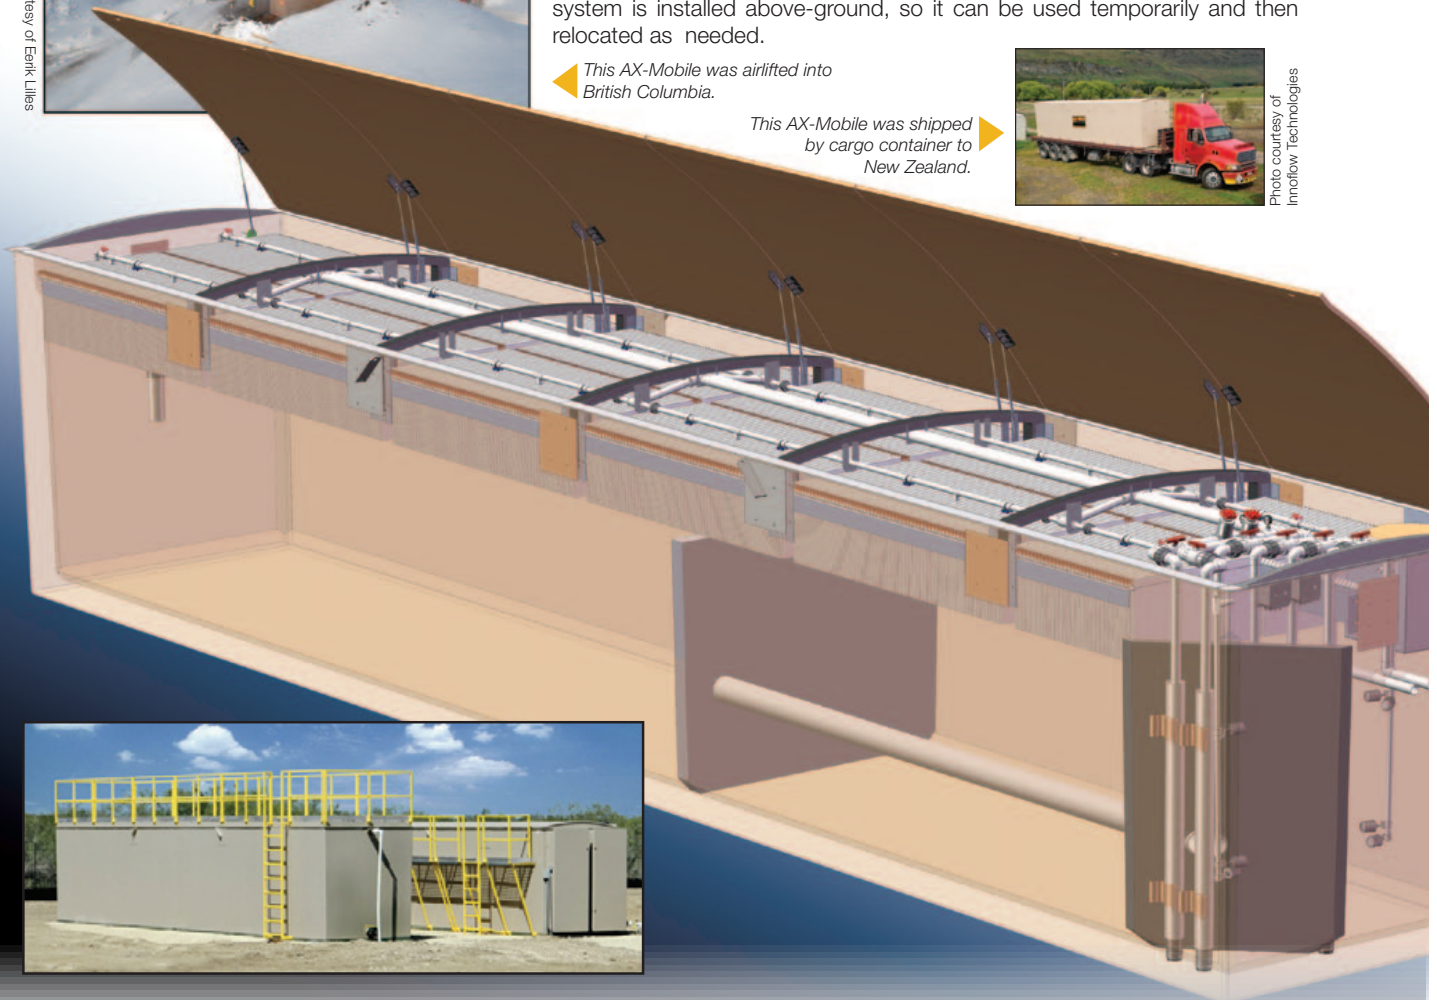

Tanks range from 14'-42' (4.3-12.8 m) long and can be installed singly, serving up to 250 people, or in multi-tank arrays serving 3,000 people or more. The system is installed above-ground, so it can be used temporarily and then relocated as needed.

◀ This AX-Mobile was airlifted into  
British Columbia.

This AX-Mobile was shipped  
by cargo container to  
New Zealand. ▶

## A PLACE TO START

- RESPONSIBLE
- EXPANDABLE/CONTRACTIBLE
- REUSABLE
- SUSTAINABLE
- AFFORDABLE
- EASILY DO-ABLE
- TEMPORARY, RIGID WALL SHELTERS

COMPLETE INSTALLATION  
IN LESS THAN 7 DAYS!

### HOUSING UNITS

- Easily Configurable floor plans
- Solar Lighting
- Clean/Bright Interior
- Warm/Friendly Exterior
- Energy Efficient
- Independently Heated Propane/Fuel Oil
- Quick/Easy assembly/disassembly
- Beds
- Desks/Chairs
- Foot Locker style closets

### VERY LOW IMPACT

- All Structures Temporary, Reusable, Sustainable secured with screw in anchors and straps
- Housing Units Solar Powered, no electrical trenching/or overhead
- Independent Power Generation adjacent to requirement encased in a noise filtering RTS Structure. No cords strung throughout facility
- Fresh and Waste water containment adjacent to facilities housed inside insulated RTS Structures.
- Gravel Roads/Parking Facilities clean access, easy removal
- Fully Fenced with screening to facility containment and safety
- Hydro mulched grounds provide landscaped commons areas which facilitate Community

### RESTROOMS/SHOWERS

- Fully Self Contained Units
- Independent/Lockable Facilities
- Trailer Mounted eases installation/removal
- Supply/Waste water adjacent in RTS Structure
- *WATER CONSERVATION AT ITS BEST*
- System uses only 1 pint per flush!
- Electrical Power Generation for each unit  
*Independent Power Generation adjacent to requirement encased in a noise filtering RTS Structure. No cords strung throughout facility*

### LAUNDRY FACILITIES

- Fully Self Contained Units
- Gas Dryers/ Electrical Washers
- Trailer Mounted eases installation/removal
- Supply/Waste water adjacent in RTS Structure
- Water Conserving Washers
- System uses only 1 pint per flush!
- Electrical Power Generation for each unit  
*Independent Power Generation adjacent to requirement encased in a noise filtering RTS Structure. No cords strung throughout facility*

### CENTER HUB PROVIDES:

- Single footprint or quick assemble air beam structure
- Community Center
- Climate Controlled Space
- Cafeteria Serving  
*3 meals per day*  
*Pay per meal*  
*Healthy Alternatives*
- Small Offices for Services:  
*Counseling*  
*Job Placement*  
*Chapel*  
*Bottled Water*  
*Drug Screening*  
*Security*  
*Leasing Agent*  
*Sponsor Booths*  
*Direct Hire Area*  
*Clothing Rental (for interviews)*

### VO-TECH "TASTING EXPERIENCE"

- Manufacturing of products for the Landing Zone
- Woodworking
- Plumbing
- Electrical
- Computer Aided Design and Manufacturing
- Construction Skills
- Online Marketing and Sales
- Money Management

### CONTRACT SERVICES AVAILABLE:

- Security
- Bottled Drinking Water
- Cafeteria
- Facilities Maintenance
- Installation
- Management
- Fresh/Wastewater services
- Internet Services

### INCLEMENT WEATHER CAPABILITIES

- Housing units:  
*Thermally efficient*  
*Independently Heated Propane/Fuel Oil*  
*85psf Snow Load Ratings*  
*125mph Wind Load Ratings*
- All Water contained within Heated RTS Structures
- Large Fresh and Waste water holding tanks  
*Fill and dump only every few days*
- Center Hub heat-able for comfort even in Northern Exposures
- Center Air Conditioning capabilities in Southern Exposures

### ON SITE WASTE WATER TREATMENT FACILITIES

- Used World Wide
- Self-contained proven treatment facilities
- Shop-Built units fully assembled
- Mobile transport from holding facility to plant
- Stationary units sit above ground

### IN ADDITION to all the above specifications, The Landing Zone 350 has these capacities:

- Houses 352 People
- 12-Couples Units/2 per Unit
- 51-Singles Units/6 per Unit
- 4-Family Units/4 per Unit
- 3-ADA Compliant Units/2 per Unit
